Many preschool-aged children have vision problems, but it is not always obvious when a vision problem is present. These problems include lazy eye, crossed eyes and blurred vision caused by nearsightedness, farsightedness or astigmatism. Children who are referred after a screening frequently require treatment. If these problems are detected early enough, there is a good chance that the problem can be treated and won't become permanent.

The Elks Children's Eye Clinic in Casey Eye Institute at Oregon Health and Science University supports this Preschool Vision Screening Program as a public health service. Teachers, nurses and volunteers are trained to perform the screening. Simple tests are used to measure distance and depth perception. The screening tests are not the same as having a complete eye examination. If the vision screening suggests that your child may have an eye problem, we strongly recommend that he/she see an ophthalmologist or optometrist for a comprehensive, dilated eye exam.

The Casey Eye Institute is conducting a research study on the results of these screenings. If you agree to participate in this research, the results of your child's vision screening will be entered into a computer database. We may also contact you to ask you if you have any questions or if you need help finding an eye care specialist for a complete eye examination or assistance with the treatment plan. We will obtain the eye exam results and enter them into a computer database. These results will help determine if the screening tests are good enough or if they should be changed. Casey Eye Institute will maintain the confidentiality of your child's information in accordance with all applicable state and federal laws and regulations. Any information that could identify your child and family will not be used without your permission. You will be given a copy of this consent form. **ALL INFORMATION YOU GIVE WILL BE KEPT CONFIDENTIAL.**

**I give my consent to the disclosure of the above information.**  
*Doy mi autorización para revelar la información mencionada arriba.*

The Oregon State Elks Association generously supports the Preschool Vision Screening Program

Muchos niños en edad prescolar tienen problemas de la vista, pero estos problemas no siempre son evidentes. Estos problemas incluyen ambliopía, estrabismo y visión borrosa causada por la miopía, la hipermetropía o el astigmatismo. Los niños que son referidos después de una prueba de detección con frecuencia requieren tratamiento. Si estos problemas se detectan a tiempo, hay una buena oportunidad que el problema pueda ser tratado y no se convierta en permanente.

El Elks Children's Eye Clinic en Casey Eye Institute en Oregon Health and Science University apoya a este programa de examen de la vista como un servicio de salud pública. Los maestros, enfermeras y voluntarios están capacitados para realizar las pruebas de detección. Las pruebas simples se utilizan para medir la distancia y profundidad de percepción. Las pruebas de detección no es igual a realizarse un examen ocular completo. Si el examen de la vista indica que su hijo tiene un problema de visión, le recomendamos firmemente que él/ella visite a un oftalmólogo u optometrista para un examen completo del ojo dilatado.

El Casey Eye Institute está realizando un estudio de investigación acerca de los resultados de estas pruebas de detección. Si usted acepta participar en esta investigación, los resultados de las pruebas de detección de la vista de su hijo(a) serán ingresados en una base de datos por computadora. También podemos comunicarnos con usted para preguntarle si tiene alguna pregunta o si necesita ayuda para encontrar un oftalmólogo para un examen ocular completo o ayuda con el plan de tratamiento. Nosotros obtendremos los resultados del examen de la vista y los ingresaremos a la base de datos por computadora. Estos resultados ayudarán a determinar si las pruebas de detección son lo suficientemente buenas o si se deben cambiar. Casey Eye Institute mantendrá la confidencialidad de la información de su hijo(a) de acuerdo con todas las leyes y regulaciones estatales y federales. Cualquier información que pueda identificar a su hijo(a) y familiares no serán utilizadas sin su permiso. Se le entregará una copia de este formulario de consentimiento. Toda la información que proporcionará será confidencial.
