

## HAVE YOU LOOKED AT YOUR SKIN LATELY?

You may just find something you've never seen before. Melanoma is the most deadly form of skin cancer. If it is caught early, survival rates are great — if it is left untreated over time, survival rates drastically decrease. Stop and look. Melanoma is the cancer you can stop with your eyes.

**Check your skin. Check your partner's skin.  
And if you see something, get it checked out.**

### LEARN MORE

Learn about melanoma — what to look for, how to look, and what to do if you find something.

**Take the pledge to Start Seeing Melanoma.**
