# Inclusive and Low Cost Photo Sources

It is important that images within recruitment and study materials represent the full spectrum of people, genders, race, ethnicity, age, body shape, ability and so much more. When choosing images, ensure they are inclusive and representative of the people and populations you are hoping to recruit.

Obtaining photos can often be a barrier for study teams, as many image websites are expensive and outside the study budget, in addition to having limited selection. Below is a list of sites that provide a broad selection of images at low to no cost.
