

HIGH SCHOOL OUTREACH PROGRAM

The *War on Melanoma's* mission is to eliminate melanoma related-deaths in Oregon through access to education, awareness, early detection and prevention strategies.

1 in 5

10,000

are diagnosed with skin cancer each day in the United States*

5

million new diagnosis expected in 2022*

UV Rays 80% still penetrate cloud coverage

Oregon has one of the highest rates of new melanomas in the United States (CDC, 2019).

SKIN CANCER IS PREVENTABLE

especially when it is detected early!

Let's build up our next generation by providing students with the skills and knowledge to take their skin health into their own hands with the help of our lesson plan available for teachers (at no cost)!

Melanoma is a cancer you can SEE with your eyes.

Students build skills for:
Early Detection

1. How to self-skin exam
2. Normal vs. Abnormal moles
3. ABCDE criteria for moles

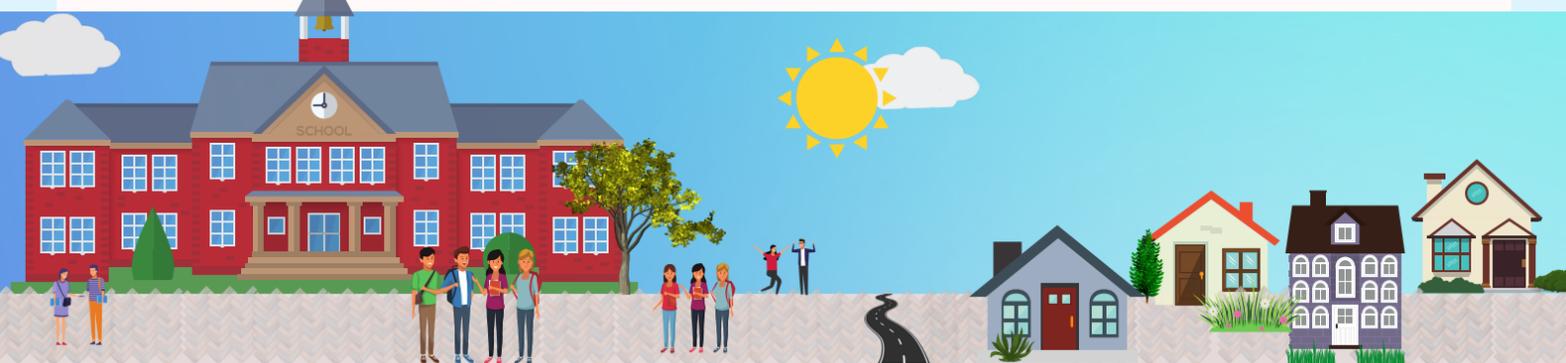

Prevention

1. Sun safety
2. Health behaviors
3. Sunscreen

WE AIM TO EDUCATE STUDENTS HOW TO LOOK AT THEIR SKIN AND IF THEY SEE SOMETHING, TO SAY SOMETHING.

There are 471 High Schools in Oregon

Our goal is to have teachers provide the lesson plan for students at every high school around the state to protect the next generation from melanoma.

The War on Melanoma needs ongoing support even beyond 2022, to continue protecting the health of communities

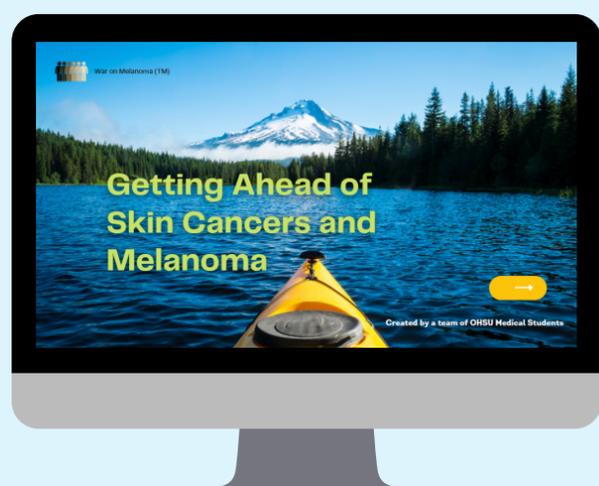

Teachers can now access our

50-minute Interactive Lesson Plan

In-Person OR Online

options available upon request
