

# Permanent hair removal prior to vaginoplasty

Skin of the scrotum and the space behind the scrotum could be used to make the vagina. Remove all hair between the thigh creases.

If you wish to keep hair on the outer labia, discuss this with your surgeon for more information during your consultation.

Remove all hair from the scrotum below 2 cm beneath base of penis, between thigh creases

Remove all hair from the perineum (space between scrotum and 1 inch above anus) between thigh creases
